SUMMARY

Frontend-focused Full Stack Engineer with 4.5+ years of experience developing enterprise, fintech, and mobile applications using React.js, TypeScript, Next.js, and Node.js. Skilled in reusable component architecture, state management, REST API integration, performance optimization, and scalable frontend development. Experienced with React Native, Redux Toolkit, React Query, and AI-assisted development, with working knowledge of Express.js, MongoDB, and MERN architecture.

SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Next.js, React Native, HTML5, CSS3, Tailwind CSS, Material UI
State & Architecture: Redux Toolkit, React Query, Context API, Custom Hooks, Reusable Components, DTO Mapping, Feature-Based Architecture, Caching
Backend & Databases: Node.js, Express.js, REST APIs, JWT, OAuth, Webhooks, RBAC, MongoDB, Mongoose, MySQL, PostgreSQL
Performance & Testing: Code Splitting, Lazy Loading, Rendering Optimization, Jest, React Testing Library, Firebase Crashlytics
AI & DevOps: AI-Assisted Development, LLM Integration, Git, GitLab, GitHub, Postman, Jira, Docker, CI/CD
Additional Knowledge: Redis, Kafka, RAG Fundamentals, Swagger

EXPERIENCE

Ernst & Young (EY) India LLP Jun 2026 – Present
Technical Consultant *New Delhi, India*

- Develop **Government Digital Systems** using **React.js, TypeScript, Vite, and Redux Toolkit**, building responsive interfaces for complex public-sector workflows with robust validation and API integration.
- Build modular frontend architecture using reusable components, shared DTOs, mappers, API services, Redux slices, and custom hooks, improving maintainability and consistency across application modules.
- Implement dynamic forms, multi-step workflows, data-driven tables, and field-level validation using reusable components and predictable state management for complex government service processes.
- Integrate **REST APIs** through centralized service layers, standardized data mapping, and consistent error handling to improve data reliability and simplify integration across frontend modules.
- Optimize component rendering and state updates to reduce rendering bottlenecks and improve frontend reliability; leverage **AI-assisted coding and debugging** to investigate defects and improve code quality.
- **Tech:** React.js, TypeScript, Redux Toolkit, Vite, Material UI, Tailwind CSS, REST APIs, GitLab

MobilePe Fintech Pvt. Ltd. Oct 2023 – Jun 2026
Full Stack Developer *Noida, India*

- Developed fintech applications for payment gateways, BBPS, merchant portals, settlements, and admin dashboards using **React.js, Next.js, React Native, and Node.js** for business-critical financial operations and transaction management.
- Built merchant onboarding, transaction monitoring, reconciliation, and settlement workflows with REST APIs and role-based access controls, supporting secure and reliable fintech operations across multiple business use cases.
- Developed cross-platform mobile features using **React Native**, reusable UI components, and REST API integration, improving consistency and maintainability across supported mobile platforms.
- Implemented **React Query** caching, background synchronization, and optimistic updates to improve data freshness and UI responsiveness; collaborated on Node.js services and transaction API integrations.
- Contributed to a **25% reduction in application crashes** through performance improvements and production issue analysis using **Firebase Crashlytics**; leveraged AI-assisted coding and debugging to accelerate investigation and resolution of recurring defects.
- **Tech:** React.js, Next.js, React Native, Node.js, TypeScript, Redux Toolkit, React Query, REST APIs

Tata Consultancy Services Aug 2021 – Nov 2022
Software Engineer *Bangalore, India*

- Developed enterprise web features using **React.js, JavaScript, HTML5, and CSS3**, building reusable components and responsive layouts for maintainable, user-friendly business applications.
- Implemented dynamic forms, protected routes, and authentication UI flows, integrating REST APIs to deliver data-driven screens with consistent navigation and access handling.
- Resolved frontend defects through systematic debugging, API validation, and collaboration with backend and QA teams, improving application reliability, reducing recurring UI issues, and preventing regressions through thorough validation.
- **Tech:** React.js, JavaScript, HTML5, CSS3, REST APIs, Git

Newgen Software Apr 2021 – Jul 2021
Software Engineer Intern *Noida, India*

- Developed banking workflow UI modules using JavaScript, HTML5, and CSS3, implementing dynamic forms, client-side validation, and structured input handling for business workflows.
- Resolved UI defects and supported functional testing and deployment activities, improving usability, validating expected behavior, and strengthening reliability across banking workflow modules.
- **Tech:** JavaScript, HTML5, CSS3

EDUCATION

GL Bajaj Institute of Technology and Management 2017 – 2021
B.Tech. in Computer Science Engineering – 78.24% *Greater Noida, India*
