SUMMARY

Frontend Developer with 4.5+ years of experience building scalable web and mobile applications using **React.js, Next.js, React Native, and TypeScript**. Experienced in frontend architecture, reusable component systems, API integrations, and performance optimization. Skilled in delivering production-ready enterprise applications in Agile environments with a focus on scalability, maintainability, and seamless user experience.

SKILLS

Frontend: React.js, Next.js, React Native, TypeScript, JavaScript (ES6+), Tailwind CSS

Architecture: Micro Frontend, RBAC, Modular Architecture, Component-Driven Architecture, Scalable UI Systems

State Management: Redux Toolkit, React Query, TanStack Query, Context API

Performance Optimization: Code Splitting, Lazy Loading, Virtualization, Bundle Optimization, Rendering Optimization

Backend & APIs: Node.js, Express.js, REST APIs, JWT, OAuth, Webhooks, API Integrations

Tools & Platforms: Git, CI/CD, Firebase Crashlytics, Postman, Chrome DevTools, Jira

Domain Expertise: Fintech, Merchant Payments, BBPS, UPI, KYC, Settlements, Reconciliation

EXPERIENCE

MobilePe Fintech Pvt. Ltd.

Frontend Developer

Oct 2023 – Present

Noida, India

- Led development of scalable fintech, **BBPS**, and merchant payment platforms with **RBI-compliant workflows**, secure authentication, webhooks, and REST API integrations.
- Architected and optimized a high-performance **React Native** merchant application, reducing production crashes by **25%** using lazy loading, Crashlytics monitoring, encryption, and automated testing.
- Built scalable **Admin**, **Super-Admin**, and Merchant portals with centralized **RBAC**, protected routing, and dynamic permission management.
- Developed onboarding, reconciliation, settlement, analytics, and workflow automation modules with optimized API orchestration, caching, and throttling strategies.
- Improved frontend performance by reducing bundle size by **35%** using code splitting, lazy loading, dynamic imports, and reusable component architecture.
- Implemented enterprise-grade security practices including **JWT/OAuth**, **PCI-DSS** compliant workflows, API security hardening, and encryption mechanisms.
- Developed scalable **Next.js + TypeScript** applications with **SSR/CSR** optimization, SEO-focused rendering, and efficient state management using React Query/TanStack Query.
- Collaborated with backend, QA, product, and DevOps teams in Agile environments to deliver scalable production-ready applications with improved release stability.
- **Tech Stack:** React.js, React Native, Next.js, TypeScript, Redux Toolkit, React Query, Node.js, REST APIs, Microservices, Jest, CI/CD, MySQL, MongoDB, Firebase Crashlytics, Git.

Tata Consultancy Services

Software Engineer

Aug 2021 – Nov 2022

Bangalore, India

- Developed reusable frontend modules including **authentication flows**, modal systems, and shared UI components for scalable enterprise applications.
- Integrated secure **REST APIs** and improved user experience through responsive UI development, DOM optimization, and form validations, reducing UI defects by **30%**.
- Enhanced frontend performance using **bundle optimization**, lazy loading, virtual scrolling, and rendering improvements for high-traffic application screens.
- Collaborated with cross-functional **Agile teams** to deliver scalable frontend features, resolve production issues, and improve application stability.
- Improved component reusability and UI consistency using **modular architecture** and reusable frontend development practices.
- **Tech Stack:** React.js, JavaScript (ES6+), Tailwind CSS, REST APIs, Responsive Design, Git, CI/CD, Chrome DevTools, Agile.

Newgen Software

Software Engineer Intern

Apr 2021 – Jul 2021

Noida, India

- Built secure banking workflow forms using **JavaScript**, HTML5, CSS3, validation workflows, and DOM manipulation for enterprise financial operations.
- Automated data transformation and processing workflows, improving **operational efficiency** and reducing manual effort.
- Supported deployment, debugging, testing, and release verification activities to ensure stable **production rollouts** and issue resolution.
- Worked on frontend validations, UI enhancements, and workflow optimizations for enterprise banking applications.
- **Tech Stack:** JavaScript, HTML5, CSS3, DOM Manipulation, Form Validation, Debugging, Deployment Support.

EDUCATION

GL Bajaj Institute of Technology and Management

Bachelor of Technology (Computer Science Engineering) – 78.24%

2017 – 2021

Greater Noida, India
