SUMMARY

Senior Frontend-focused Full Stack Engineer with 4.5+ years of experience building enterprise, fintech, and mobile applications using React.js, TypeScript, Next.js, and Node.js. Experienced in reusable architecture, state management, REST API integration, performance optimization, and AI-assisted development, with knowledge of Express.js, MongoDB, authentication, LLM integration, and scalable MERN application design.

SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Next.js, React Native, HTML5, CSS3, Tailwind CSS, Material UI
State & Architecture: Redux Toolkit, React Query, Context API, Custom Hooks, Reusable Components, DTO Mapping, Feature-Based Architecture, Caching
Backend & Databases: Node.js, Express.js, REST APIs, JWT, OAuth, Webhooks, RBAC, MongoDB, Mongoose, MySQL, PostgreSQL
Performance & Testing: Code Splitting, Lazy Loading, Rendering Optimization, Jest, React Testing Library, Firebase Crashlytics
AI & DevOps: LLM Integration, Prompt Engineering, RAG Fundamentals, AI-Assisted Coding and Debugging, Git, GitLab, GitHub, Postman, Jira, Docker, Redis, Kafka, Swagger, CI/CD

EXPERIENCE

Ernst & Young (EY) India LLP Jun 2026 – Present
Senior Technical Consultant *New Delhi, India*

- Developing **Government Digital System** using React.js, TypeScript, Vite, and Redux Toolkit, building responsive interfaces for complex public-sector workflows with robust validation and consistent API integration.
- Build modular frontend architecture using reusable components, shared **DTOs,Mappers**, API services, Redux slices, and custom hooks, improving maintainability and consistency across application modules.
- Implement dynamic forms, multi-step workflows, data-driven tables, and field-level validation using reusable components and predictable state management for complex government service processes.
- Integrate **REST APIs** through centralized service layers, standardized data mapping, and consistent error handling to improve data reliability and simplify integration across frontend modules.
- Optimize component rendering and state updates to reduce rendering bottlenecks and improve frontend reliability; use **AI-assisted coding and debugging** to investigate defects, streamline troubleshooting, and improve code quality.
- **Tech:** React.js, TypeScript, Redux Toolkit, Vite, Material UI, Tailwind CSS, REST APIs, GitLab

MobilePe Fintech Pvt. Ltd. Oct 2023 – Jun 2026
Full Stack Developer *Noida, India*

- Developed fintech applications for payment gateways, BBPS, merchant portals, settlements, and admin dashboards using **React.js, Next.js, React Native, and Node.js** for business-critical financial operations and transaction management.
- Built merchant onboarding, transaction monitoring, reconciliation, and settlement workflows with REST APIs and role-based access controls, supporting secure and reliable fintech operations across multiple business use cases.
- Developed cross-platform mobile features using **React Native**, reusable UI components, and REST API integration, improving consistency and maintainability across supported mobile platforms.
- Implemented **React Query** caching, background synchronization, and optimistic updates; collaborated on Node.js services, API contracts, and transaction workflows to improve data freshness and application responsiveness.
- Contributed to a **25% reduction in application crashes** through performance improvements and production issue analysis using **Firebase Crashlytics**; leveraged AI-assisted coding and debugging to accelerate investigation and resolution of recurring defects.
- **Tech:** React.js, Next.js, React Native, Node.js, TypeScript, Redux Toolkit, React Query, REST APIs

Tata Consultancy Services Aug 2021 – Nov 2022
Software Engineer *Bangalore, India*

- Developed enterprise web features using React.js, JavaScript, HTML5, and CSS3, building reusable components and responsive layouts for maintainable, user-friendly business applications.
- Implemented dynamic forms, protected routes, and authentication UI flows, integrating REST APIs to deliver data-driven screens with consistent navigation and access handling.
- Resolved frontend defects through systematic debugging, API validation, and collaboration with backend and QA teams, improving application reliability, reducing recurring UI issues, and preventing regressions through thorough validation.
- **Tech:** React.js, JavaScript, HTML5, CSS3, REST APIs, Git

Newgen Software Apr 2021 – Jul 2021
Software Engineer Intern *Noida, India*

- Developed **banking workflow** UI modules using JavaScript, HTML5, and CSS3, implementing dynamic forms, client-side validation, and structured input handling for business workflows.
- Resolved UI defects and supported functional testing and deployment activities, improving usability, validating expected behavior, and strengthening reliability across banking workflow modules.
- **Tech:** JavaScript, HTML5, CSS3

EDUCATION

GL Bajaj Institute of Technology and Management 2017 – 2021
B.Tech. in Computer Science Engineering – 78.24% *Greater Noida, India*
