

Shashank Tripathi

Senior Frontend Developer

casperky700@gmail.com

[8319298374](#)

[Portfolio](#)

Senior Frontend Developer with 4+ years of experience building secure, scalable applications using React and React Native in fintech environments. Specialized in architecting high-performance solutions, scalable distributed systems, and complex payment workflows across web and mobile platforms. Strong focus on frontend architecture, performance engineering, API-driven design, application reliability, and delivering secure and seamless user experiences.

Education

GL Bajaj Institute of Technology and Management

78.24%

B.Tech(CSE)

Greater Noida • August 2017 - August 2021

Skills

Languages

JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend Frameworks

React.js, Next.js, React Native, Redux Toolkit, Tailwind CSS, Vite

Mobile & Platform

Android/iOS Build, Deep Linking, Push Notifications

Architecture & Concepts

Micro-frontend Architecture, Component-Driven Development, State Management, Modular Design, Performance Optimization, Code Splitting, CSR, SSR, SSG

Backend & APIs

REST APIs, Axios, Node.js, Data Handling, Logging & Monitoring

Cloud / DevOps

Git, GitHub, CI/CD, Jira, Vite, Google Firebase

Testing & Debugging

Chrome DevTools, Postman, Production Debugging, Error Handling

Build & Deployment

Android/iOS build pipelines, Release management, Production debugging

Security

Token-based Auth, JWT, OKTA

Computer Science Fundamentals

Data Structures & Algorithms(Basics), Stack/Queue, Recursion, Arrays, Strings, Hashing, Time & Space Complexity Analysis

Experience

Mobilepe Fintech Private Limited

Frontend Developer

Noida

October 2023 - Present

- Led **end-to-end development** of merchant payments, **UPI, BBPS**, settlements, and transaction processing, including secure authentication, webhooks, and **REST APIs**.
 - Architected a scalable React Native app, **reducing production crashes by 25%** using lazy loading, end-to-end encryption, Crashlytics monitoring, and Jest testing.
 - Designed **frontend RBAC** with centralized permission mapping and **protected route guards**, enabling dynamic rendering and fine-grained access control.
 - Built a **fintech ecosystem** (Admin, Super-Admin, Merchant Apps) using reusable UI modules, improving deployment speed and maintainability.
 - Implemented compliance workflows: KYC, onboarding, reconciliation, analytics using caching, **rate limiting and throttling**.
 - Optimized performance, reducing **bundle size by 35%** and startup time via code splitting, lazy loading, and dynamic imports.
 - Ensured **enterprise-grade security** with RBI compliance, **PCI-DSS, JWT/OAuth**, API gateway practices, and **end-to-end encryption**.
- Tech Stack:** React, React Native, TypeScript, Redux Toolkit, Node.js, REST APIs, JWT/OAuth, Microservices, Webhooks, Jest, CI/CD, MySQL, MongoDB, Monitoring & Logging, UPI/Fintech APIs

Tata Consultancy Service

Software Engineer

Bangalore

August 2021 - November 2022

- Designed reusable frontend modules — **authentication**, modal systems, shared components — improving code reusability, UI consistency, and team development velocity.
 - Improved UX and performance using DOM optimization and form validations, reducing major UI defects by 30%.
 - Integrated REST APIs with secure flows and resolved production issues using Chrome DevTools, improving stability and error-resolution time.
 - Implemented performance improvements with bundle size optimization, **virtual scrolling**, and lazy loading, enhancing load performance for high-traffic screens.
- Tech Stack:** React.js, JavaScript, Tailwind CSS, REST APIs, Chrome DevTools, Web Performance, Debugging, Responsive Design, Virtual Scrolling, Git, CI/CD, Agile.

Newgen Software

Software Engineer(Intern)

Noida

April 2021 - July 2021

- Built secure, high-accuracy **ICICI Bank financial forms** using validation workflows, DOM manipulation, and data-driven rules, enhancing data integrity for critical financial processes.
 - Automated large-scale data operations using **OmniExtract** for data transformation, reducing manual effort and improving operational accuracy.
 - Supported deployment and release cycles through testing, debugging, and post-deployment verification, ensuring rollout stability and delivery quality.
- Tech Stack:** JavaScript, HTML5, CSS3, Form Validation, DOM Manipulation, OmniExtract, Deployment Support, Performance Optimization.
